

SHETH .L.U.J AND SIR M.V COLLEGE

PRACTICAL NO :- 1

SUBJECT :- DATA VISUALIZATION WITH POWER BI AND

AIM :- Getting Started with Tableau and Building Basic Visualizations

Part A: Connect to Dataset & Explore the Interface

1. Launch Tableau Desktop on your machine .
2. On the left-hand blue navigation pane under Connect, click on Text File (Tableau treats CSVs as text files).
3. Select your CSV file from your Mac Finder and click Open.
4. You will be taken to the Data Source page. Here, preview your data rows at the bottom to ensure they look correct, then click Sheet 1 at the bottom left to enter your workspace. Tableau will bypass its faulty drivers, create a native workspace called Clipboard, and instantly open up Sheet

1. Launch Tableau Desktop on your machine .

Part B: Identify and Differentiate Measures and Dimensions

Look closely at your Data Pane on the left. Tableau reads the metadata of the Superstore CSV and

splits your items automatically:

- Dimensions (Categorical / Blue Icons): Fields containing text, dates, or geography. In Superstore, look for fields like Category, Segment, State, or Order Date. They slice your data into distinct groups.
- Measures (Numerical / Green Icons): Fields containing raw quantitative values. Look for fields like Sales, Profit, or Quantity. Tableau will automatically summarize or average these values whenever you place them on a chart.

5. Drag it back onto Columns. Instead of individual column blocks, Tableau now draws a singular, smooth, continuous numeric axis line.

Part D: Create and Customize a Basic Bar Chart

1. From your Data Pane, find the Category dimension and drag it up onto the Columns shelf.

the Color tile in the Marks card.

4. Label customization: Drag the Sales pill from the data pane and drop it onto the Label tile in the

Marks card to display the precise revenue numbers over the bars.

5. Double-click the bottom tab sheet name Sheet 1 and rename it to Category Bar Chart.

Part E: Build a Line Chart for Time-Series Analysis

1. Click the New Worksheet button at the very bottom tab bar (the small icon with a chart and a plus symbol).

2. Drag the Order Date dimension onto your Columns shelf.

4. Drilling Down: Look at the blue YEAR(Order Date) pill sitting in your Columns shelf. Click the small + icon located on that blue pill. It will expand your data into Quarters and Months, revealing hidden sales trends over time.

5. Double-click the sheet tab at the bottom and rename this worksheet to Sales Trend.

Part G: Combine Charts into an Interactive Dashboard

1. Look at the bottom navigation tab bar and click the New Dashboard icon (it looks like a small 2x2 grid window pane with a plus symbol).
2. On the left side panel, you will see a list of your worksheets: Category Bar Chart, Sales Trend, and State Profit Map.
3. Drag your Category Bar Chart sheet onto the empty dashboard canvas area.
4. Drag your Sales Trend sheet and drop it right along the bottom edge of the bar chart workspace.
5. Drag your State Profit Map and drop it alongside the right side of the layout.
